

Your partner  
for design and production  
of innovative painting-  
and logistic jigs

# OUR SERVICES

- Design  
of painting and logistic jigs
- Prototype build  
of plastic jigs
- Serial production  
of plastic jigs
- Take-back and recycling  
of coated jigs

# SIZE ACCURACY

Produce your parts “accurately fitting”

## The plastic jig with filigree fixtures

- Accurate positioning
- Suitable for complex geometries
- Soft loading and clamping
- Reproducible quality by CNC processing
- Applicable for roboter handling

“It’s better to bend  
than to break”

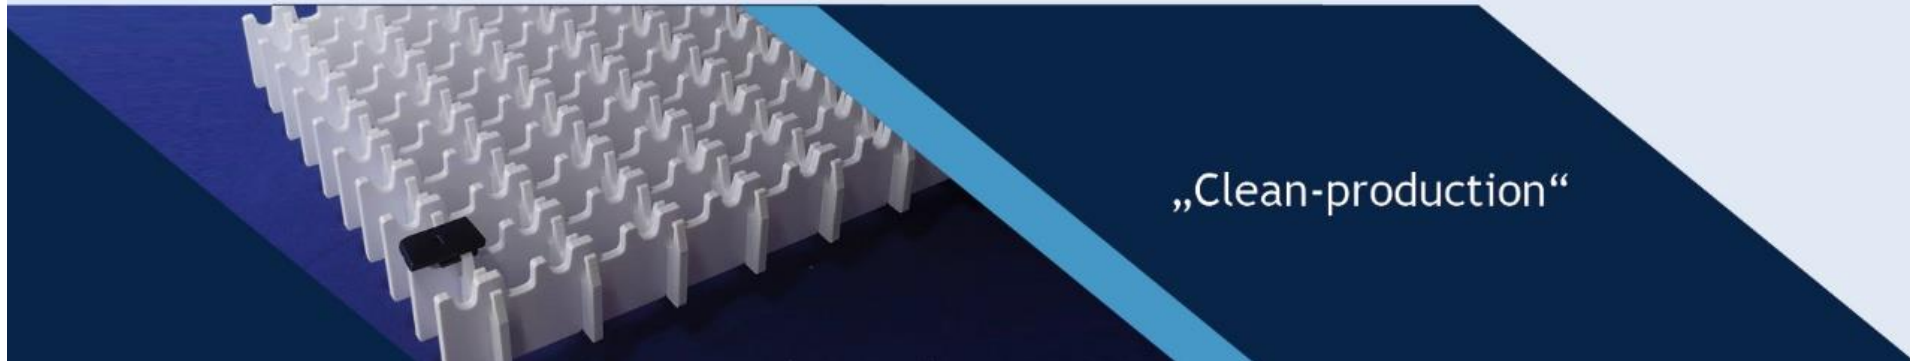

# CLEANLINESS

Reduce your “scrap”

## Plastic jig for a clean painting result

- Reduced coating amount by slim jig design
- Low abrasion leads to clean surface
- Suitable for power washer / CO2 pre-cleaning / UV painting / UV drying

„Clean-production“

Motivate your employees  
through „lightweight“

# WEIGHT

## Produce “lightweight”

**Lightweight plastic jig starts at 900 gr**

- Increased circulation rate per jig
- Improved health and safety
- Comfortable handling

# INVEST

Produce at “low cost”

## Plastic jig with low initial costs

- Reduce the number of jigs to the effective minimum
- No tooling costs
- High flexibility for changes
- Low lead time

“low costs -  
increased productivity”

Our customers produce with “Kupca-Kunststoffsysteme” for the following OEMs:

**KUPCA**  
Kunststoffsysteme

Mercedes-Benz

**Miele**

**BOSCH**

B/S/H/

**SIEMENS**
